Accelerated Asset Conversion & Liquidation Services

Controlled & Orderly Liquidations

To effectively sell a company or its assets, both proprietary and hard, more than a **“Going Out of Business”** sign is necessary.

Silicon Valley Liquidator Service takes into account the current market and marketplace for particular assets at the time of the sale as well as the various needs and obligations of the company to create a disposition strategy, which will bring the highest recovery for the assets to be sold.

Often, when assets are highly specialized and there are little to no time constraints, **Silicon Valley Liquidator Service** will conduct an orderly liquidation sale. Our sales crew will photograph and catalogue the Company’s assets, set target selling prices on an itemized basis and negotiate sales with interested buyers.

In this manner, **Silicon Valley Liquidator Service** actively seeks out buyers for the available assets, without the urgency of an auction sale. This is a highly effective manner of sale when there are a limited number of potential purchasers for specific assets, and in certain industries, which are not suited to auction sales.

Silicon Valley Liquidator Service also will consider a purchase of your Business Industrial Equipment outright!
